

RECARO

SITTING SAFELY TO WIN SAFELY

The RECARO racing seats for motorsport

MAXIMUM PERFORMANCE AT THE LIMITS

Ingenious Design by RECARO

Motorsport – it's all about the toughest tests of driver and material. High speeds, centrifugal forces, vibrations, jumps, impacts, maximum braking. Those looking for success in motorsport must be able to rely on their equipment. One hundred percent. No ifs, ands, or buts.

For RECARO Automotive Seating, ingenious design in motor sports means the combination of safety, ergonomics, comfort and quality – for us, compromises are out of the question. At RECARO, one thing always stands at the center of everything we do: people. Based on you and your requirements as a semi-professional or professional racing driver, we have developed a program for racing seats, which we present on the following pages – the reference work for sitting optimally in racing vehicles.

Ingenious design is an indispensable part of our heritage, our "brand DNA." This claim was born in the course of our more than 100 years of company history, and has grown up with a constant stream of new ideas. That means: innovation from tradition. As we see it, design goes far beyond the basic meaning of the word: it encompasses every single step on the way to the RECARO racing seat. Innovative concepts, materials, shapes and processing methods ensure that your RECARO experience is always a very special one.

On the racetrack, offroad in a rally car or on long-distance races – winners rely on RECARO.

NO COMPROMISES BOUNDLESS TRUST

For over 40 years

Experience pays off. We started developing seats for motor racing about 40 years ago. It's a challenging task to which we dedicate our full know-how and innovative power as seat experts. Because motorsport is about one thing above all others – providing protection for the human body and the best-possible support. Each second on the race track demands maximum concentration and total awareness. The best racing seat is the one the driver hardly notices. Because it holds and supports him naturally, like a second protective skin.

The safety provided by the racing seats from RECARO Automotive Seating can not only be felt. It is also tested, proven and confirmed under the hardest of conditions. Our products meet the high requirements of the FIA in all disciplines. The FIA approval applies to the entire system (RECARO racing seat in conjunction with specified sidemount).

We are also the first and only manufacturer to offer independently tested seats and sidemounts that permit both rigid mounting and solutions with fore-aft adjustment. Our latest products, the RECARO Pro Racer Ultima XL and the RECARO P 1300 GT, have been approved for ten years in accordance with the new FIA standard 8862-2009 for Advanced Racing Seats.

As a seat specialist with 40 years of motorsport experience, RECARO supports the "FIA Action for Road Safety" for safe seating comfort on all racing circuits.

FEEL THE PROTECTION INDIVIDUALLY ADJUSTABLE

Comfortable and modular

A racing car isn't comfortable. It's loud, hard, reduced to the essentials. As the interface between human and machine, the seat gives the driver direct feedback in each thousandth of a second – about the chassis, tires, brakes, engine, and road quality. And is at the same time so customized that the driver can concentrate on the race without restriction.

At RECARO, we make this possible with our combined knowledge of the human anatomy and in particular the spine. Our racing seats are ergonomically designed to provide the best-possible protection for the back as well as optimal support against all the forces the back has to endure while maintaining posture.

We supplement this basic comfort with features such as replaceable pads in three different sizes. Individual comfort requirements can therefore be adjusted in no time at all. Another plus point: the pads do not cover the entire seat, but are targeted solely at the contact points with the body. That permits passive air conditioning of the seat, allowing the air to circulate. Our modular system also has shells that can be optionally mounted with a rigid or flexible sidemount. The latter permits fore-aft adjustment inside the vehicle. Both comfort seats are ideal for racing use with frequent and fast changes of driver.

GUARANTEED FIA APPROVED

All RECARO racing seats are approved as complete systems (RECARO racing seats in conjunction with rigid or flexible sidemounts) to the high requirements of the FIA. **Under the new FIA 8862-2009 standard, the systems are tested with forces that are 4.6 times greater!**

FIA 8855-1999

Validity:
Approval valid for five years.

Scope:
Racing seat plus rigid sidemount.

Type of tests:
Exclusively dynamic tests

- 1. Rear impact 20 g with dummy 50% (75 kg):**
Test with dummy, backward 20 g over 50 ms
- 2. Side impact 15 g with dummy 50% (75 kg):**
Test with dummy, forward and backward 15 g over 50 ms
- 3. Rear impact 10 g with dummy 50% (75 kg):**
Test with dummy, backward 10 g over 50 ms

FIA 8862-2009 (Advanced Racing Seat)

Validity:
Approval applies for ten years, already introduced for WRC; in future also for FIA world championships GT and WTCC.

Scope:
Seat substructures including rigid and flexible sidemounts are approved as part of the seat system.

Type of tests:
Change from dynamic to quasi-static tests in order to ensure controlled, dosable loads, exact, reproducible test arrangements, and precise results.

Much greater test requirements – increased by around 300% – for rear impact and side impact, specially in the pelvis, shoulder and head areas of the racing seat.

Three consecutive tests with forces of between a total of 32 kN (approx. 3.3 metric tons) and 60 kN (approx. 6.1 metric tons):

- 1. Static load test** (against direction of travel):
14 kN with max. movement at pelvis,
14 kN with max. movement at shoulder,
7 kN with max. movement at headrest
- 2. Side load test:**
14 kN with max. movement at pelvis,
11 kN with max. movement at shoulder,
7 kN with max. movement at headrest
- 3. Compression test:**
Seat must absorb energy of 1 kJ, whereby the applied later load must not exceed 30 kN and the specified inward deformation of the seat must not exceed 200 mm; backward 10 g over 50 ms.

THE PATH TO YOUR RECARO SEAT

Your totally personal RECARO seat experience in the cockpit is just a few steps away. Take your time – and begin by asking yourself a few questions: In which racing series (semi-professional/professional) will the seat be used? Which FIA standard must it fulfill? Must it be compatible for HANS systems? As a single driver, do I need a seat with a rigid sidemount or is the seat intended for a team with frequent changes of driver? Which material – ultra-light carbon or conventional glass fiber reinforced plastic – will I opt for with regard to the factors of weight and cost?

1

Step 1 – Information: Which RECARO racing seat is the right one for me?

Find full details about the current product range of racing car seats in this brochure, online at www.recaro-automotive.com under Seatfinder Motorsport, or in the showroom at one of our authorized RECARO partners (online under Dealer search). That's the first step to finding which RECARO model is your dream seat and how it meets your personal requirements.

2

Step 2 – Decision: How do I configure my RECARO seat?

For a balanced decision, we always recommend you seek personal advice from a authorized partner. It can often provide just the solutions you need to meet your personal requirements. Trying out all the features of your preferred seat in depth should complete your visit to the showroom.

You can also select your racing seat online at www.recaro-automotive.com. To do this, click on the Seatfinder Motorsports under the Motorsport menu and select your preferred features. Clicking directly on one of the selected seats will give you detailed information about it. Please note that special sidemounts are required to install RECARO racing seats. Only in the correct combination is your RECARO racing seat perfectly combined with the racing car – only then will the FIA approval apply.

You should also learn about the technical requirements of your vehicle and, if necessary, the installation dimensions of your vehicle. This brochure contains the technical specifications of our product range.

3

Step 3 – Order: How do I order my RECARO seat?

Ideally, you should order your RECARO racing seat direct from your authorized partner. It will check your product choice, match the technical prerequisites and also order the complete scope of delivery, including baseframes, sidemounts, etc., for you from RECARO. Your RECARO will then be delivered to the service partner as a ready-to-install package.

4

Step 4 – Installation: How is the racing seat fitted into my car?

You should have your RECARO racing seats installed only by a qualified and authorized partner.

ULTIMATE RELIABILITY IN EXTREME CONDITIONS

The RECARO racing seats to FIA 8862-2009 (Advanced Racing Seat)

As a professional motorsport driver, you move at the limits in every respect: You are under extreme tension and exposed to extreme loads. RECARO racing seats offer you the performance you need on your journey to success: with maximum safety, optimal hold, and absolutely reliable quality. Independently tested for ten years according to the new, stricter FIA standard for "Advanced Racing Seats."

THE SEATS FOR WINNERS

The world innovation for professional motorsport with the license to win: its combination of maximum safety and individual comfort is what makes our new RECARO P 1300 GT so unique. It is the first racing seat in the world to conform to the new FIA 8862-2009 standard for "Advanced Racing Seats" and comes with fore-aft adjustment thanks to the flexible sidemount. With its replaceable pads in three sizes and the flexible sidemount, it gives drivers maximum personalization options. It is ideally suited for racing use with frequent and fast changes of driver. The RECARO P 1300 GT is approved exclusively for use in GT and touring car sport.

// RECARO P 1300 GT

Standard features

- + Certified according to FIA 8862-2009 (Advanced Racing Seat)
- + Seat shell made of carbon fibre
- + Developed for the use of HANS systems
- + Suitable for 4-, 5- or 6-point belts
- + Head protector
- + Shock-absorbing foam
- + Highly flame-retardant upholstery
- + Replaceable pads:
Pad Kit M for drivers of medium build (standard feature)
- + FIA approval for 10 years

Accessories

- + Flexible sidemount RECARO P 1300 GT ideal for races with driver changes (130 mm fore-aft adjustment, tilt angle can be varied by max. 3° during installation)
- + Rigid sidemount RECARO P 1300 GT
- + Pad Kit S: Replaceable pads for drivers of small build
- + Pad Kit L: Replaceable pads for drivers of large build
- + Lumbar pad

Weight

approx. 11.4 kg (without pads/upholstery)

SAFE FROM THE START SAFE AT THE DESTINATION

The RECARO racing seats to FIA 8855-1999

Get into semi-professional and professional motorsport without making any compromises: Unique design, materials of the highest standard and excellent methods of manufacture give our RECARO racing seats their outstanding product qualities.

FOR PROS WITH A CLAIM TO WINNING

Our top product for GT and touring car sport to FIA 8855-1999 – the RECARO Pro Racer was developed for the use of HANS systems and is available in four variants.

They differ on the one hand through the seat material – glass fiber reinforced plastic (GRP) or carbon composite (CFRP) – and on the other through the size: the optional XL version is both wider and higher. New is the FIA approved flexible sidemount for fore-aft adjustment (only Pro Race SPA), which offers the driver even more individual adjustment options.

// RECARO Pro Racer SPG & SPA

Standard features

- + Developed for the use of HANS systems
- + Suitable for 4-, 5- or 6-point belts
- + Head protector
- + Shock-absorbing foam
- + Flame-retardant upholstery
- + Friction grip surface around the shoulders

Accessories

- + Steel sidemount
- + Aluminum sidemount
- + Flexible sidemount RECARO Pro Racer SPA ideal for races with change of driver
- + Seat cushion

RECARO Pro Racer SPG & XL

- + Seat shell made of glass fiber reinforced plastic (GRP)
- + **XL:** Seat shell 35 mm wider and 35 mm higher

RECARO Pro Racer SPA & XL

- + Seat shell in Carbon-Kevlar® composite (CFRP)
- + **XL:** Seat shell 35 mm wider and 35 mm higher

Weight

- Pro Racer SPG: approx. 10.0 kg
- Pro Racer SPG XL: approx. 11.0 kg
- Pro Racer SPA: approx. 6.5 kg
- Pro Racer SPA XL: approx. 7.0 kg

PREMIUM HOLD IN ALL LOCATIONS

Ideal for offroad and rally use – the professional shell of the RECARO Profi SPG (glass fiber reinforced plastic) and SPA (carbon composite) has been proven on thousands of occasions and offers superb lateral hold on an off the racetrack. The XL variant of the seat is not only wider and higher, but also has larger belt slots.

// RECARO Profi SPG & SPA

Standard features

- + Suitable for 4-, 5- or 6-point belts
- + Shock-absorbing foam
- + Flame-retardant upholstery
- + Friction grip surface around the shoulders
- + Screw-mounted panels on the belt slots

FOR START TO FINISH VICTORIES

As its name suggests, the RECARO Pole Position (FIA) racing seat provides the best conditions for all beginners and professionals who want to battle for a place on the podium from pole position. Its generous features and numerous individualization options for cushions and upholstery make it the popular favorite in GT, touring car and club sport.

// RECARO Pole Position (FIA)

Standard features

- + Seat shell made of glass fiber reinforced plastic (GRP)
- + Suitable for 4-, 5- or 6-point belts
- + Flame-retardant upholstery

TECHNICAL DATA

FIA approval 8862-2009 (Advanced Racing Seat)

KEY TO THE DIMENSIONS OF THE RECARO RACING SEATS:

Package dimensions:

- A: Seat depth
- B: Seat height
- C: External shell dimension at shoulder
- D: External shell dimension at seat cushion
- I: Width of substructure
- J: Tilt at mounting level

Comfort dimensions:

- E: Seating width
- F: Height of shoulder support

Belt slot:

- G: Center belt slot
- H: Height of belt slot

■ Dimensions in mm

NOTE:

- Mounting width for racing seats: 406 mm (not for RECARO Pro Racer Ultima 1.0, RECARO Pro Racer Ultima XL and RECARO P 1300 GT)
- The dimensions of the racing seats RECARO Furious, Pole Position (FIA), Apex, Profi SPG, Profi SPG XL, Profi SPA, Pro Racer SPG/SPA and Pro Racer SPG/SPA XL were determined in standard position (upper mounting point at front and lower mounting point at rear).
- The dimensions of the RECARO P 1300 GT were determined in the rearmost position.
- Weight: total shell weight (without mounted parts).
- RECARO racing shells can be individually fitted into nearly all racing cars. Not permitted in the area of the StVO – excluding FIA/ ASN licensed events.
- FIA approval 8855-1999 and 8862-2009 (Advanced Racing Seat) apply only in conjunction with specified sidemount.
- The RECARO motorsport seats are made by hand to our highest quality standards. Due to this special manufacturing process, the lamination may in exceptional instances result in slight tolerances to the specified dimensions and weights.
